**REQUEST FOR CLEAR ELABORATIONS ON YELLOW FEVER REGULATIONS**

Reference is made on your letter Ref. M.07/7/175 of 10/2/2011 with the above heading.

Tanzania's position on Yellow fever requirement for travelers entering our country remains unchanged. All travelers coming from endemic countries are required to produce evidence of yellow fever vaccination. This travel requirement does not apply to those travelers coming from non-endemic countries. Travelers from non-endemic countries travelling through endemic countries are subject to yellow fever vaccination only if they stay outside the Airport or have a long connection up to twelve hours.

As you have indicated in your letter, in some cases your clients encountered malpractices of yellow fever regulation. I would like to assure you that the Ministry will take stern measures against any health staff who contravenes the laid down procedures and protocol for yellow fever screening. In this context, we would like to request your collaboration with the Ministry on any malpractice that you might encounter.

Attached please, find a list of countries that fall under yellow fever endemic countries  
Thanks you for your cooperation

Dr. Donan W. Mmbando  
**For: Elias B.M Chinamo.**

**Table of Countries in the Yellow Fever-Endemic Zone**

Africa			Central and South America
